

Protect Your Clients and Boost Your Revenue with SpecOp Secure's Cyber Protect

Our industry-leading cybersecurity service offers a comprehensive approach to securing your clients' digital lives.

Cyber Protect Includes

Endpoint Protection

- Advanced Threat Intelligence continuously monitors and manages endpoints to detect and neutralize threats.
- Protects all home devices, regardless of number
- Includes protection for up to five additional devices (phones, tablets, and computers) that travel outside the home.
- Protection for more devices is available for an additional fee.

Advanced Firewalls

- Cloud-managed firewalls with advanced intrusion prevention, detection, geo-fencing, and more.
- AI-driven threat analytics keep our SOC updated, blocking unauthorized access and defending against the latest threats.
- Enables secure internet browsing through VPN services.

Content Filtering

- Blocks access to malicious websites and phishing attempts, enhancing security for the client's site.

Real-Time Threat Detection

- Uses advanced algorithms and machine learning to proactively identify and neutralize threats.

Risk Assessments

- Identifies vulnerabilities and uncovers attack vectors.
- Provides an action plan to address critical threats.
- Increase your revenue by reselling remediation services and ensuring compliance.

Password Management

- Offers simple, secure password sharing across all devices, enabling safe sharing among family, associates, or staff.

Cyber Protect Cost

\$249 / month

Suggested Retail Price

\$499 / month

Installation and commissioning completed in approximately **1 to 2 hours**.

Tailored, Premium Cybersecurity Solutions

Cyber Protect +

As a full-service cybersecurity provider, SpecOp Secure offers Cyber Protect +, a premium, concierge-level solution designed to meet your client's specific needs. Our dedicated team personalizes support through strategic planning and tailored services.

Cyber Protect + Services May Include

Security Operations Center (SOC) Management

- Employs a Defense-in-Depth strategy with continuous, overlapping security layers to robustly monitor and defend your clients' digital assets.
- Designed by the National Security Agency (NSA), this multilayered approach ensures sophisticated cyberattacks are managed effectively.

Incident Response

- 24/7 readiness to respond to incidents, minimizing damage to your clients.
- Detailed post-incident reports and preventive strategies after incident remediation.

Security Information and Event Management (SIEM)

- AI-driven security analytics platform that detects sooner, investigates faster, and responds before threats escalate.

Threat Hunting

- Uses SIEM to recognize and address potential security threats and vulnerabilities.
- Eliminates blind spots and strengthens detection and defense.

Other Services

- Penetration Testing (external, internal, and Cloud services) and Phishing Simulators.
